

LOW PROFILE SERIES

THE LOW PROFILE SERIES

Global IFS has the solution to upgrade older buildings into high performance office spaces with faster move-in, lower operating costs and space planning flexibility with our 2.5" Low Profile Raised Access Flooring. The low profile pedestal system offers the ultimate wire and cable management capacity beneath the floor due to the 24" on center pedestal spacing. Power and data access under the floor makes a space flexible for long term, so you can always reconfigure your layout with minimal tenant disruptions.

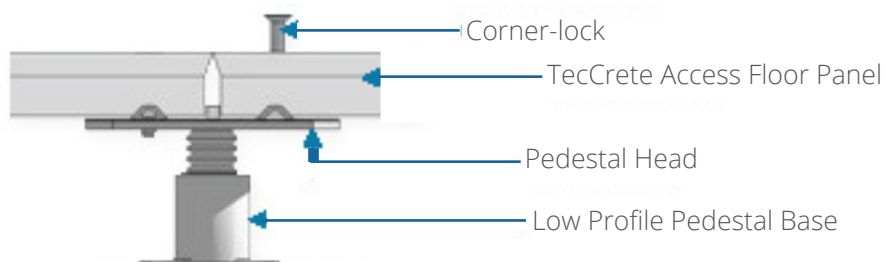

FEATURES

- The adjustable pedestal supports ensure a flat, solid floor system on uneven slab conditions
- Up to 40% more wiring capacity beneath floor due to 24" on center pedestal spacing
- No extra costs for slab coring or trenching
- Plug and play ultra low profile electrical boxes and power distribution boxes can easily be relocated with floor plan changes in tenant occupied spaces
